Liposuction

Technology: High Energy Pulsed Electromagnetic

Applicators: 4 Applicators

Magnetic Power: 10 Tesla ± 20%

Magnetic Frequency: Symmetric Biphasic Pulse, Max 150Hz

Treatment Protocol: Auto Mode and Manual Mode

Treatment Time: 30 Minutes

Pulse Width: 260µs

Interface: 10'Touch Screen

Power: 3500W

Dimension: $460 \times 380 \times 1130$ (mm)

Accessory

Power Cord

Coolant Inlet /Coolant Outlet Tube

Bandage

Screwdriver

BodyScupit

REDEFINING YOUR REAL SELF

Muscle Building

Pulsed Electro Magnetic Wave

High technology exclusively dedicated to a slimmer body

UNIQUE SMALL HANDLE CURVED

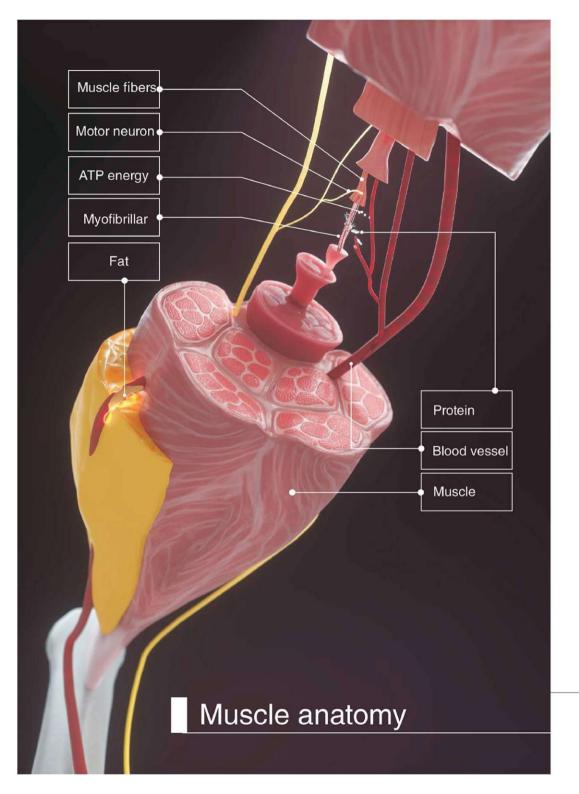

BodyScupIt

Equipped with 4 worldwide unique applicators, 2 different sizes worldwide

Unique small handle curved, ergonomic, perfect for arm, waist, hips, thigh and calf.

HOW IT WORKS?

IT IS NOT ONLY ABOUT FAT

Voluntary contractions may increase the demand for energy from fat cells. Released epinephrine signals the fat cells to initiate lipolysis.

Intensive supramaximal contractions enhance release of epinephrine which triggers a cascade effect leading to supramaximal lipolysis in fat cells

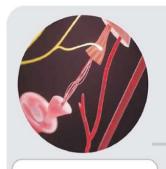

The free fatty acids(FFAs) overflow causes cell dysfunction and induction of apoptosis programmed cell death. Dead cells collapse and are naturally flushed away.

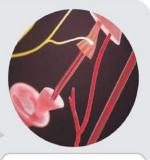

Intensive supramaximal contractionsstimulate muscles' respondence with a deep remodeling of its inner structure, results in increased muscle density and volume.

Myofibrillars loosen

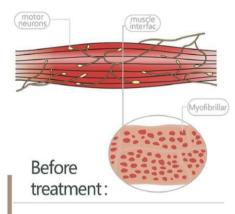

As age grows, Myofibrillars are loose and fragile because of pregency, fat accumulation, lack of exercies and other factors. People become fatter and flabbier.

Myofibrillars break

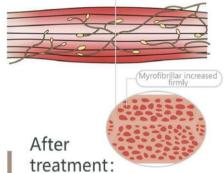

The equipment interact with muscle neurons to induce supra maximal muscle contractions. In the process of continuous muscle contractions, part of Myofibrillar are gradually broken to cause muscle self-repair.

Myofibrillars repair

After treatment, Myofibrillars tend to be strong and tight. Muscle becomes firm and elas tic. It responds with a deep remodeling of inner structure that result in muscle building and growth and body shaping.

Muscle is thin and the circumference of muscle is short. Myofibrillar is loose with small density.

Muslce is strong and the circumference of muscle is long. Myofibrillar is strenthened and increased with large density.

TO GET AN ATTRACTIVE BODY YOU NEED TO BUILD MUSCLE

BodyScupit

treatment, 30 minutes,

20000 crunches or squats

100% supramaximal muscle contractions,

other exercises only reach to 20-30%

Abdominal muscle mass increased by 16%

Abdominal muscle firmness increased by 11%

PRIVATE HEALTH OF WOMEN

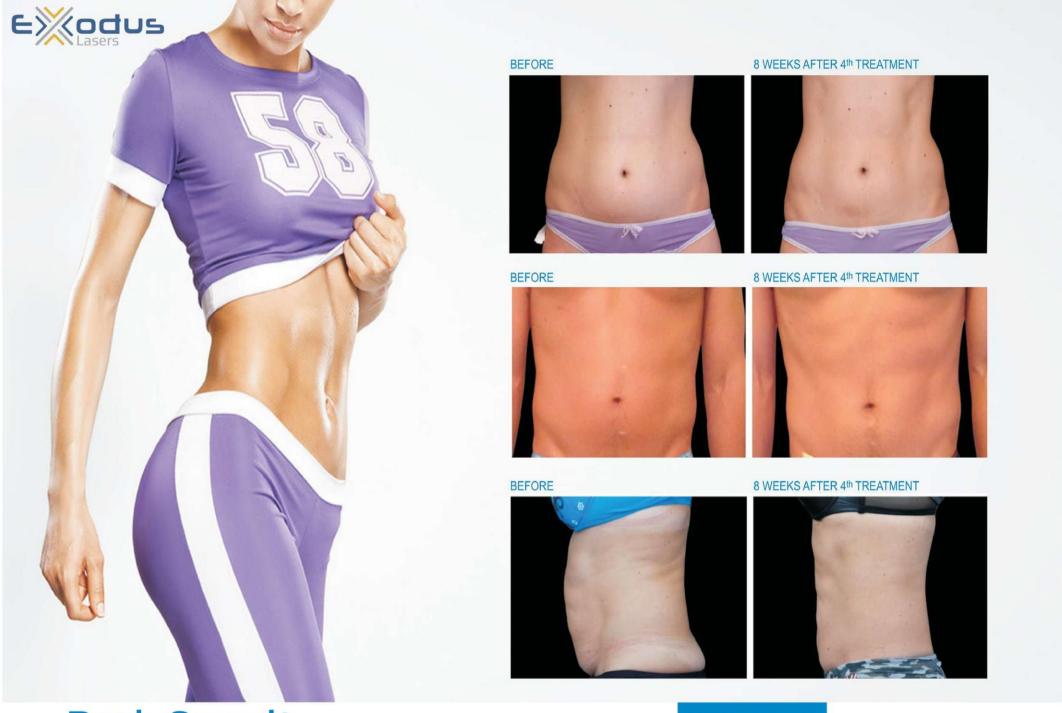

Rectus Abdominis Firming Solution

Vagina Firming Solution

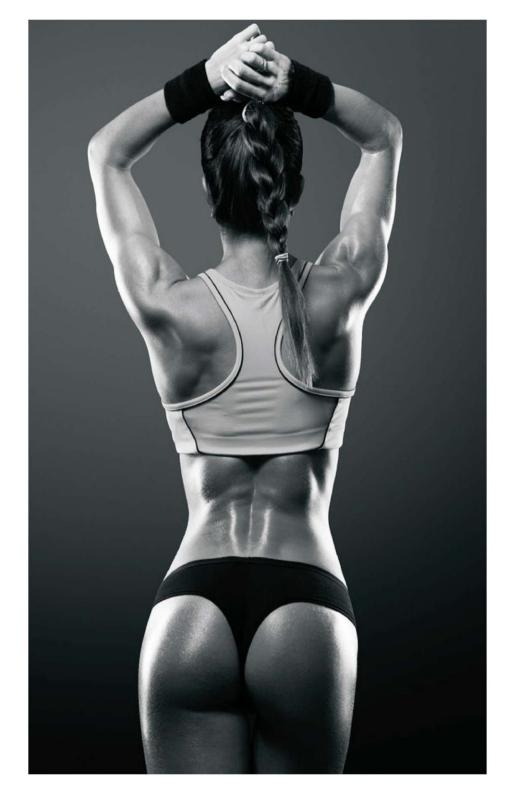

Firm the skin:

Emscuplt uses high-energy focused electromagnetic wave technology and high-magnetic pulses to generate directional motion force. One operation is equivalent to 10,000 Kegel exercises. It stimulates motor neurons to control pelvic floor muscle contraction, activates pelvic floor tissue, and promotes collagen regeneration.

Indications: vaginal relaxation, pelvic floor muscle relaxation, urinary incontinence, uterine prolapse, etc.

SEATED WORKING HEAD

Nicely Fit in Multiple Models

High-energy-focused electromagnetic technology fully activates pelvic floor muscle. It perfectly simulates the curve of the buttocks and accurately targets the gluteus. The 15° inclination design allows the legs to relax naturally. The raised support area in the center accurately fits the pelvic floor muscles. It's suitable for men and women of all ages and effectively solves various pelvic floor muscle injuries.
